PROFESSIONAL SUMMARY

Full-stack developer with 1.5+ years of production experience building MERN/MEAN and React Native applications serving 100,000+ users on a Punjab Government-backed platform. Shipped two independent AI-powered products (SKTCH.AI, Aurora) from scratch, integrating GPT-4o, Claude, and Gemini into real, deployed systems.

TECHNICAL SKILLS

Languages: Java, C++, JavaScript, HTML5, CSS3, TypeScript

Backend/Runtime: Node.js, Express.js, Next.js

AI/APIs: OpenAI GPT-4o, Google Gemini, Claude API, pgvector

Frontend/UI: React.js, Angular.js, React Native, Tailwind CSS

Database/Cloud: MongoDB, PostgreSQL, Cloudinary, Cloudflare R2

Tools: Git, Docker, Vercel, Render, Postman, VS Code

PROFESSIONAL EXPERIENCE

Masters' Union (formerly Venturepact Outgrow Pvt. Ltd.) New Delhi, India

Associate Software Developer — MERN/MEAN Stack, React Native, AI Integration Nov 2024 – Present

- Delivered full-stack features across web and Android (MERN/MEAN + React Native) on live production platforms serving **100,000+ users**; worked across 4 products simultaneously in a fast-paced startup environment.
- Built the **quiz submission and evaluation flow** (PSCP) end-to-end across Web and Android — score computation, course progress tracking, and cross-platform state consistency; developed a **Helpdesk feature** for student query management with an admin-side resolution interface.
- Engineered a **Milestone & Term Lock Service** for structured course gating and an **Achievements & Badges engine** that auto-awards based on configurable user activity rules.
- Built **Peer Discussions** (MUAI V2) — a full student forum with **Gemini API-powered AI moderation** to automatically flag harmful content before publishing; implemented **Role & User Management** for *Salescoach* (B2B sales platform, launching to production).
- Delivered AI-driven **Word of the Day** via Gemini API, complete auth flows (role-based login, OTP reset, FCM push notifications), and a GPA-based leaderboard with real-time online status.

PERSONAL PROJECTS

SKTCH.AI | [sktchai.com](#) | *AI-powered UI Builder — draw a wireframe or describe an idea, get production-ready React + Tailwind code*

- Tech Stack:** React 19, TypeScript, Vite, Tailwind CSS v4, Node.js/Express, MongoDB Atlas, Cloudflare R2, Cloudinary, OpenAI GPT-4o, Anthropic Claude, Gemini 2.5 Flash — deployed on Vercel + Render.
- Engineered a **two-step AI pipeline**: GPT-4o Mini pre-analyzes sketches into a structured JSON blueprint, then routes to the selected model (GPT-4o / Claude / Gemini) for JSX generation — cutting prompt token cost by **60%+**; built real-time streaming via **SSE** with a live split-pane code preview.
- Implemented a public sketch ecosystem (Excalidraw canvas, R2 persistence, gallery with likes/forks/views) and secured the platform with JWT rotating refresh tokens, Google OAuth 2.0, and per-route rate limiting.

Aurora | [aurora-walls.com](#) | *Premium Wallpaper Platform with AI-powered visual & semantic search*

- Tech Stack:** Next.js 16 (App Router, RSC), Hono, Drizzle ORM, PostgreSQL, pgvector, Cloudflare R2 — monorepo via pnpm workspaces + Turborepo, deployed behind Cloudflare CDN.
- Implemented **AI visual similarity search** using CLIP embeddings stored in pgvector with hybrid scoring (75% cosine similarity + 15% category + 10% tag overlap); built **semantic mood search** enabling queries like “feels like 3am Tokyo” to return visually relevant results.
- Engineered a creator upload pipeline with **parallel AI content moderation** (Sightengine), automated CLIP embedding generation, and a **time-decay trending algorithm** pre-computed hourly via background scheduler.

EDUCATION

Netaji Subhas University of Technology (NSUT) New Delhi, India

B.Tech, Computer Science with Specialization in Artificial Intelligence 2023

Army Public School New Delhi, India

12th Grade 2019

CERTIFICATIONS

Web Development: Internshala Trainings (93%)

C++ Foundation with Data Structures: Coding Ninjas

Standard Java — MERN Stack: Coding Ninjas
